

With the skill set of **DATA ANALYST**

POSITION OVERVIEW

The Health Information Management Data Analyst (HIMDA) is responsible for documenting the types and structures of the business, data analyzing and mining business data to identify patterns and correlations among the various data points, mapping and tracking data from system to system in order to solve business or system problems. The position requires analytical skills and data management skills to develop solutions to business problems.

QUALIFICATIONS

A Bachelor's degree in Health Information Management with a RHIA (Registered Health Information Administrator) or a Bachelor's degree in a health-related field with licensure as a RN (Registered Nurse).

COMPETENCIES

- Formulate validation strategies and methods to ensure accurate and reliable data
- Evaluate existing data structures using data tables and field mapping to develop specifications that procedure accurate and properly reported data
- Integrate data from internal or external sources in order to provide data analysis and/or reporting
- Analyze health data using appropriate testing methods to generate findings for interpretation
- Interpret analytical findings by formulating recommendations for clinical, financial and operational processes
- Validate results through qualitative and quantitative analyses to confirm findings
- Design metrics and criteria to meet end user's needs through the collection and interpretation of data
